

First international symposium specifically about
speleological libraries and their activities.

... and everything that is asking for a national
gathering!

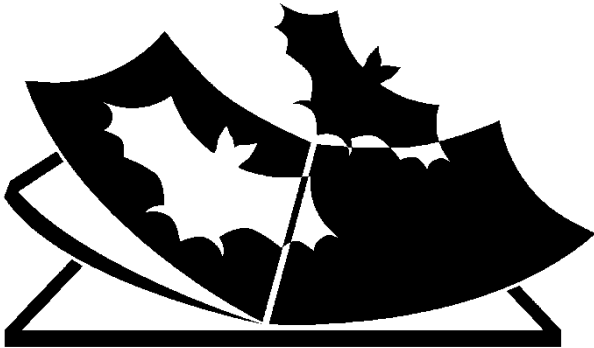

Libraries and Archives

Essential tools for progress and knowledge of speleology.

Italian Speleological Society (SSI)

Has always been committed to the care and maintenance of its own Library

Centro Italiano di
Documentazione
Speleologica
Franco Anelli
www.cds.speleo.it

Investments:

- > acquisition of materials
- > exchange of publications

Management level:

- > cataloging
- > front office service

All this thanks to

Paolo Forti who has always believed in the unifying importance of the library.

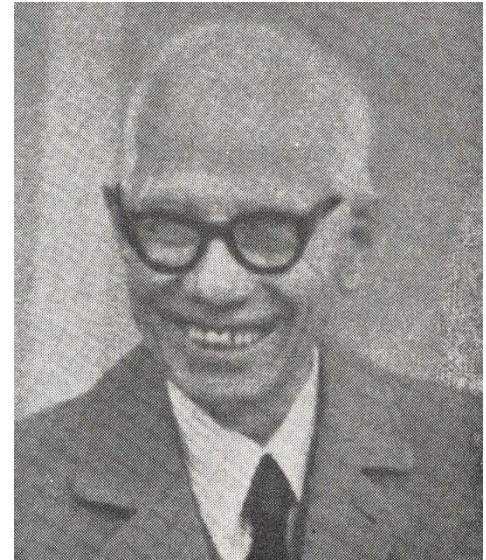

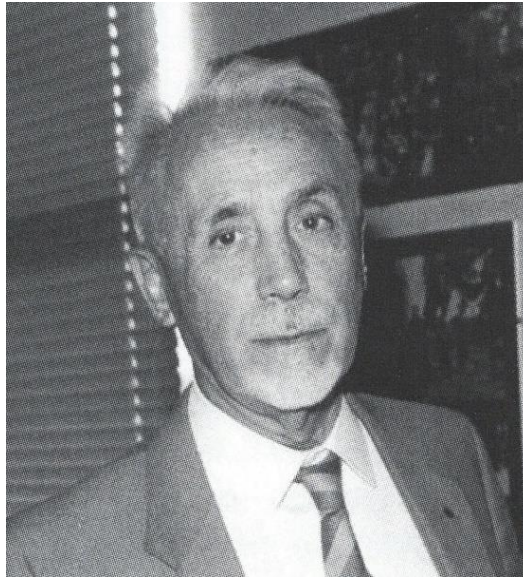

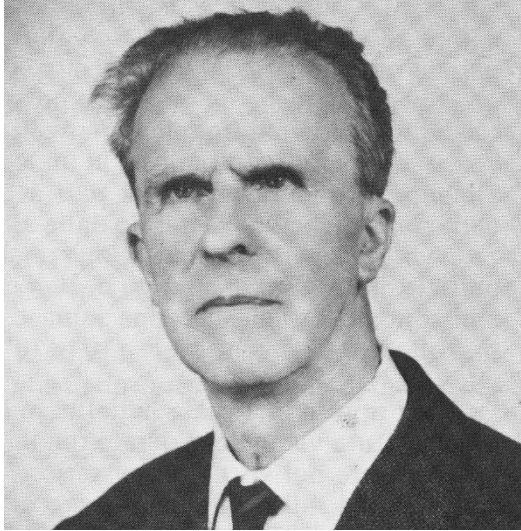

Disegno Dante Vailati

And for over twenty years the professional engagement of **Michele Sivelli**.

Important figures committed in earlier years

Leonida Boldori – first chairman of the SSI

Franco Anelli – to whom the library is dedicated

The **Mario Pavan** donation, in order of importance, for quantity of books, is second only to that of **Chabert**

Salvatore Dell'Oca

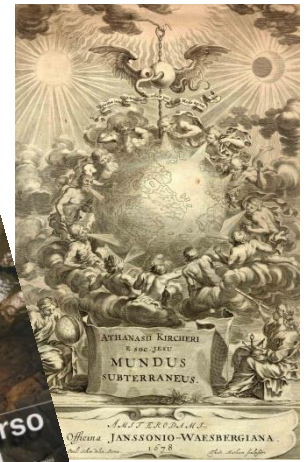

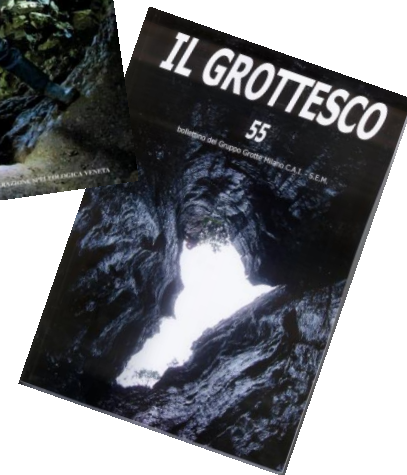

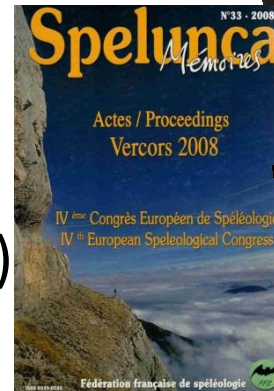

- The one who, after the world war until the seventies, contributed a lot to establishing the most important documentary archive of our country.

The librarian heritage today is fortunately preserved in the Anelli Library

The «F. Anelli» library summarized

- **8500 monographs** of which
 - 900 congresses and convention records
 - 800 ancient or rare publications
- **24000 extracts**
- **1400 periodicals** (159 active)
28000 files (estimated).
- Thousands of non librarian documents:
 - brochures,
 - ancient stamps,
 - cards,
 - posters,
 - newspapers,
 - multimedia materials.

Project Speleoteca

- Unified online catalogus (added value)
- Free participation (with training)
- Anachronism of today, the catalogues of individual libraries

The Anelli library is not limited to the conservation of a heritage

The organization is active thanks to exchange, collaborations and relations with libraries and institutions in our country and in the entire world.

ISPRA

Istituto Superiore per la Protezione
e la Ricerca Ambientale

Not everything is perfect

- All the libraries must keep up with the changing times
- The SSI is committed to making as much documents as possible completely accessible
> digitizing

- An ordinary investment for every library.

Promotion and sharing

- Promoting the library more in the speleological field.

«hidden threads»

- The library is the domain only for those who manage it
 - Preventing loss of knowledge

The library is inside the University of Bologna

Pros:

- Positive interactions
- minor costs
- more relations

Cons:

- limited ownership
- Possible eviction or a redefinition of the relationship

Strengthen the awareness

- Inside the SSI (leadership).
- Establishment of a permanent management committee
- Objectives:
 - Survival of the library (searching sponsors)
 - Conservation (of the goods)
 - Relations with our host (the University)

Passion, consistency and foresight have rewarded us and should continue to guide us. Thank you.
